Weather is a common topic of conversations in Britain. If you meet a stranger, it is safe to start talking about the weather.

Choosing a topic of conversation is about culture ~~thing~~ related to ~~privacy of an area~~. It also depends on how close with the people you talk to. Some topics are taboo in a typical conversation, especially if a talk is not between close friends or family numbers. I believe it is more or less the same in all ^{cultures} ~~countries~~.

If you are ^a foreigner, it is even more important to realize this;

otherwise, you will spoil a nice conversation by creating some

awkward moments. Therefore, it is better to learn ^{which topic you} ~~these which~~ can

^{tell about} and can't. The scopes of privacy differ from country to country,

but some are common in a civilized society, for example, it is

impolite to ask lady's age, ~~and~~ how much people earn, etc. ^{Have} ~~To have~~

a good idea of culture sensitivity in mind helps people ~~step into~~

^{Start a} ~~doors of~~ meaningful conversations ~~with other people~~. Good

conversation helps you to establish friendships among friends,

your co-workers, and business connections with your customers.
